

# Mohd Niya mul Haque

## Front-end Developer

As a Frontend Developer, I use a combination of programming languages such as HTML, CSS, and JavaScript, as well as frameworks and libraries like React. I also worked closely with designers, and backend developers to ensure that the final product meets the project's requirements and functions smoothly.

## WORK EXPERIENCE

### React js & React Native Developer Embifi Global Services Private Limited

03/2023 - 09/2023

Green Park New Delhi, Delhi

#### Achievements/Tasks

- As a Frontend Developer, I use HTML, CSS, and React.js/React Native to create visually appealing and user-friendly web pages and mobile applications. I have a strong grasp of React Native components, state management, and navigation for mobile app development, ensuring seamless functionality on both iOS and Android platforms.
- I integrate with RESTful APIs to fetch and display data, handle authentication, and manage API responses. My projects involve collaborating with Backend Developers to ensure smooth coordination between the frontend and backend aspects of the applications.

### React js Neurosensum

11/2022 - 03/2023

Gurgaon, Haryana

#### Achievements/Tasks

- I should have a deeper understanding of advanced React.js concepts such as React Hooks, Context API, Higher-Order Components (HOCs), Render Props, and React Router for managing routing in single-page applications.
- I would have worked on building responsive user interfaces that adapt well to different screen sizes and devices, demonstrating a good grasp of CSS and layout techniques.

### Web Developer IQVIA

04/2022 - 06/2022

Noida Sector 162, Advant Business Park, Up

#### Achievements/Tasks

- As an intern, Assigned to work on real projects or contribute to ongoing development tasks. This hands-on experience will allow me to apply the knowledge I gained during my education to real-world scenarios.
- I likely work closely with other developers, designers, and project managers. Learning to communicate effectively and work in a team environment is an essential aspect of my internship.

## SKILLS

HTML5

CSS3

JAVASCRIPT

REACT JS

React Native

Node js

GIT

REDUX TOOLKIT

GITHUB

## PERSONAL PROJECTS

### You Tube Clone (React Js)

- Users can search for videos based on titles, keywords, or channel names, providing a smooth and efficient search experience.
- The application will be responsive, adapting to different screen sizes and devices to ensure a consistent user experience.
- The HR web application is fully responsive, adapting to different viewport sizes and breakpoints for optimal user experience.
- Authenticated users can upload videos from their devices. The application will support video playback with options for play, pause, volume control, and full-screen mode.
- Tech Stacks :
- Front-end: React.js, HTML, CSS, JavaScript, Redux (optional for state management)
- API: Express.js (or other preferred server-side framework) for handling video uploads, video data, user authentication, and interactions with the database.
